

Convert audio to text, perform speech translation and text-to-speech with CyTrack leveraging Microsoft Azure unified Speech services

Text to Speech provides natural voice to your services that speak to users naturally with the Text to Speech service.

Speech translation models are based on leading-edge speech recognition and neural machine translation (NMT) technologies. They're optimised to understand the way people speak in real life and generate translations of exceptional quality.

- Converts spoken audio to text for intuitive interaction
- Add real-time speech-to-text capabilities to your processes for scenarios like voice commands, conversation transcription and call centre log analysis.
- Tailor your speech recognition models to adapt to users' speaking styles, expressions and unique vocabularies, and to accommodate background noises, accents and voice patterns.
- Build smart services that speak to users naturally with the Text to Speech service. Convert text to audio in near real time, tailor to change the speed of speech, pitch, volume and more.
- Add real-time speech-to-text capabilities to your processes for scenarios like voice commands, conversation transcription and call centre log analysis.
- Give your services a one-of-a-kind, recognisable brand voice using custom voice models. Simply record and upload training data, and the service will create a unique voice font tuned to your recording.
- Give your services real-time speech translation capabilities in any of the supported languages and receive either a text or speech translation back.
- Speech translation models are based on leading-edge speech recognition and neural machine translation (NMT) technologies.
- They're optimised to understand the way people speak in real life and generate translations of exceptional quality.

“Real-time speech translation capabilities are available for any of the supported languages and receive either a text or speech translation back.”

A modular suite of customer experience applications tailored to your business

CyTrack technology is a modular range of customer experience applications enabling you to pick and choose what works for you. These can be delivered individually or integrated together for a complete business solution.

Desktop call control with CRM applications and business process integration. Our web browser based application includes Presence, IM and full call control, also integrates with Outlook contacts and calendar, Skype for Business and more, send SMS by adding CySMS™ and connects to CyReport™ & CyRecord™ for powerful business solutions

Entry Level SMDR CyReport™ includes over 130 prepared reports, as well as a powerful configurable browser-based dashboard for analytics and alerts. Upgrade to CyReport Plus for Real-Time ACD & ring group reporting on supported PBX systems. CyReport connects to CyCX-Connect for contact centre reporting, and CyRecord for voice recording search and playback.

ISDN, Analogue and SIP Recording. Meet PCI Compliance with AES algorithm capable of using cryptographic keys of 128, 192, and 256 bits to encrypt and decrypt data in blocks of 128 bits. Integrates to CyReport for powerful search and replay Integrates to CRM via CyDesk

Evaluate and categorise calls at scale to measure compliance, build scorecards, rate customer sentiment. CyRecord Speech Analytics can transcribe and analyze 100 percent of your recorded calls to automatically analyze words, phrases, categories and sentiment during calls to reveal areas of opportunity or concern.

Beyond telemarketing with proactive opportunity creation. Speak to more customers and prospects with CyCall omni-channel outbound & telemarketing contact centre.

CyCX-Connect omni-channel provides the ability for your customers to communicate however they want, anywhere, anyhow via telephone, web-chat, SMS, web-callback, callback in queue, email and social media with the list growing every day.
